

FumeGard NU-162 conventional fume hood

The FumeGard NU-162 is built primarily of stress-relieved polypropylene to which NuAire has added anti-oxidizing agents and UV stabilizers. This increases tensile strength and improves thermal characteristics. NU-162 has a single piece airfoil across the bottom of the work access opening. As the sash is lowered, the face velocity increases rapidly. Fumes, gases, vapors, aerosols, and particulate are drawn through vents by an exterior exhaust duct. "Double wall" construction forms the plumbing chase for routing and connecting all services. This compartment is under negative pressure to minimize fume build-up.

NU-162 FumeGard has been independently tested to meet and exceed the requirements of ASHRAE Standard 110-1995 and is SEFA 1-1992 certified.

Available in polypropylene, PVC, CPVC, Flame Retardant Polypropylene, PVDF, HDPE or Teflon® construction.

NU-55 Fume Hood Base

polypropylene fume hood bases

The NU-55 Fume Hood Base is available as an option for NuAire polypropylene fume hoods. The NU-55 is constructed from long-lasting, corrosive-resistant, white polypropylene. The outer cabinet shell, kick panel, and shelves are constructed using 1/2 inch (13 mm) polypropylene. The rear access panels use 1/4 inch (6 mm) polypropylene.

The entire cabinet is totally seam welded and reinforced with polypropylene supports to ensure the cabinets' ability to withstand the weight of the FumeGard Fume Hood. All bases come with adjustable leg levelers with 1 1/4 inch (32 mm) maximum adjustment.
