Description

If your electrophoresis requires a high volume of samples, as well as a long run length for maximum resolution, then look no further than the ExpressCast 2340 gel box. This unit includes the Galileo's ExpressCast gel casting system for fast, tape-free gel pouring.

System Description

The 2340 is our maximum capacity system that Galileo offers, with a maximum run length of 40cm and a maximum load of 600 DNA or RNA samples. This allows the 2340 to provide a very high resolution of complex analytes as well as very high sample throughput with the tray's 12 comb slots. The 2340 features the Galileo ExpressCast gel casting system for quick, tape-free gel casting and includes a built-in bubble level and leveling screws for convenient level adjustment. Galileo also offers a wide variety of comb options to customize your order.

System Features

The Galileo 2340 complete system includes these features:

- Heavy duty lower buffer chamber
- Interlock safety lid with attached leads
- End gated 23cm wide x 40cm long ExpressCast UV-transparent gel tray with built-in fluorescent ruler and 12 comb slots.
- Four combs of your choice

System Accessories

Choose among these accessories to customize each system for your specific needs.

- Additional gel trays
- A wide range of comb options
- Gel loading guides. These guides fit into the comb slots of the gel tray, and have precision machined slots that provide accurate aligning of your multi-channel pipette during gel loading.
