New Brunswick™ BioCommand® SFI Track and Trend

BioCommand® SFI Track and Trend

PC-Based Monitoring and Data Logging for New Shakers, Freezers & CO₂ Incubators

Now you can monitor and permanently record the key operating parameters from multiple shakers, CO₂ incubators, freezers, or other OPC-compliant systems throughout your lab from a single PC.

BioCommand® SFI Track and Trend software is an easy-to-use, inexpensive, PC-based software that can trend and archive critical data including temperature, shaking speed, gas concentrations and humidity for up to 32 units, simultaneously.

BioCommand® SFI Advantages

- > Provides full monitoring and data logging capability
- > Enables rapid setup through intuitive programming
- > Offers text alarm notifications
- > Allows alarms to be annotated for complete traceability using a user-defined "add event" feature
- > Lets you customize trend screens, to monitor eight critical parameters of your choosing, per window
- > Compatible with Windows® 7, Windows Vista® and Windows XP® operating systems

Catalog No.	BioCommand SFI Packages*
M1291-1000	Shaker Package
M1291-1001	CO ₂ Incubator Package
M1291-1002	ULT Freezer Package

* Includes software, and cable to connect one shaker, freezer or CO₂ incubator. Computer requires an RS-232 or USB port. Shaker/incubator/freezer requires RS-232 or RS-485 port.

Catalog No.	To Connect Additional Units**
M1291-8001	Shaker Cable, 25 ft./7.6 m
P0620-7012	CO ₂ Incubator Cable, 15 ft./4.5 m
M1291-5001 †	ULT Freezer Cable Set, 45 ft./15 m
P0460-7751	4-Port RS-232/485-to-USB Converter
P0460-7750	8-Port RS-232/485-to-USB Converter

** When connecting multiple shakers, CO₂ incubators or freezers, in addition to a single software package, one additional cable is required for each additional system you monitor/log. Shakers and CO₂ incubators additionally require a 4- or 8-port converter. † Includes RS-485 Board.
