

Why take chances
with your results?

New! Pipette Checkit®

Verify pipette accuracy in seconds!

KEY BENEFITS

► **BE CONFIDENT IN YOUR RESULTS**

Rest assured that your pipettes are delivering accurate volumes while you conduct your experiments.

► **GET INSTANT, EASY VERIFICATION. ANYWHERE!**

Evaluate pipette accuracy on the spot in just seconds - no matter where you are. For low volumes, outperforms a 5-digit balance.

► **MAINTAIN PROPER PIPETTE TECHNIQUE.**

Use the Checkit as a training tool with students and technicians to verify proper pipette technique.

Start your day with confidence. Whenever you need a fast, quantitative assessment of a pipette's accuracy, just pull out a Checkit. Available for various size pipettes, the Checkit checks your pipette's accuracy at the bottom, middle and top of its range. Wouldn't it be nice to know whether a pipette needs recalibration, or if lab personnel could use a brush-up on their pipetting technique? With the Checkit, a clear answer is seconds away.

What if your pipette has been dropped, cleaned, or borrowed?

Pipette accuracy is critical to successful experiments. Know exactly how your pipette is performing in your lab, in your hands, under the same conditions as your experiment. Just use the Checkit on the lab bench before you begin and in seconds, be confident that your pipettes are delivering accurate volumes. No more trying to read a tiny droplet's weight on a high-precision balance.

Checkit evaluates a pipette at the top, middle, and bottom of its range.

MODELS

> INSTANT CHECKS ANYTIME

Keep Checkits in the lab for instant confirmation of pipette accuracy. Especially useful if your pipette has been dropped, cleaned, or borrowed. Don't take a chance when you're setting up an experiment with precious samples or expensive reagents.

> CONFIRM ACCURACY BETWEEN CALIBRATIONS

Perform checks regularly to watch for performance drift between calibrations. A worn or damaged pipette can drift out of calibration quickly — get early warning before there's a problem.

> TRAIN STUDENTS AND TECHNICIANS

Good pipetting technique is an important part of laboratory success. Use the Checkit as a training tool to verify proper technique. The Checkit requires no special training and is easy to use even for novice lab members.

It Doesn't Get Any Easier!

STEP 1 > FILL IT.

Fill pipette tip with dye

STEP 2 > DISPENSE IT.

Dispense dye into well

STEP 3 > FLIP IT.

Flip up well tab

STEP 4 > CHECKIT!
