

## High Capacity Series

### HC Series

The High Capacity (HC) series of refrigerators are designed for storing large quantities of a variety of materials at cryogenic temperatures. Provides temperatures of  $-196^{\circ}\text{C}$  at the liquid surface, and  $-190^{\circ}\text{C}$  at the canister top.

## Features

- Large storage capacity
- New Rugged Construction – ribbed high strength aluminum body, magnifomed necktube design, and more durable paint
- Convenient canister numbered index location ring and tapered internal spider
- Superior vacuum performance with super insulation provides maximum holding times
- Security – Optional low-level alarm is available with remote monitor and lockable lid
- Mobility – Roller bases are available for all models

(1) Evaporation rate and static holding time are nominal. Actual rate may be affected by the nature of the contents, atmospheric conditions, container history, and manufacturing tolerances.

(2) Work time is an arbitrary, reference-only value to estimate container performance under the actual operating conditions.

(3) Without canisters or racks.

(4) Optional 7th canister available to increase storage capacity by 23%.
